ÅTTA
PRINT1

TECHNICAL SPECIFICATION (POSTERS)

File formats accepted for print: PDF / EPS / TIFF / PSD / AI

Colour mode: CMYK

Size / scale: 1:1

Recommended print file resolution – 300 dpi or higher.

Recommended total ink coverage – up to 300%.

Bleed: for A0–A2 formats 5 mm on all sides; for A3–A4 formats 3 mm on all sides; for A5–A6 formats 2 mm.

Placement of design elements (text, images, logo): no closer than 5–7 mm to the trim edge, unless they are meant to be cut off.

Fonts: all text in print files must be converted to outlines; if the artwork may need editing, the font files used must be attached separately.

Do NOT include cut lines in the files, but DO add crop marks in the corners outside the bleed. If the print file was prepared in a program that cannot add crop marks, state the size of the bleed in the description.

It is advisable to also attach a JPG preview image.

File name: do not use diacritics (accented letters) or punctuation marks in the file name.

Files can be uploaded and sent via Failiem.lv
